

Vegas PBS Educational Technology Campus is Green

- The Campus is the first station in North America (US, Canada, Mexico) to receive LEED Gold Certification.
- 719 Photovoltaic rooftop panels generate over 150,000 watts of power.
- Geo-thermal wells and rooftop solar panels are two of the many ways the Campus saves energy.
- The Campus impacts employees and visitors positively with clean indoor air, day-lighting and is an overall “healthy” building.
- The Campus exceeds EPA indoor Clean Air Act requirements for children.
